Work Experience —

Senior Software Engineer | Front End Developer

Prodapt Solution

June 2023 - Present

- I have been working with the Core team as a software engineer, we are building all components required for all the teams using **Angular** and **SCSS** for telco web applications.
- Delivered comprehensive solutions for app-level functionalities, updates, and maintenance of a **utility library**; enhanced app stability and reduced crash reports by 40% within three months.
- Also worked on **mono repository**, **UI**, **Util libraries**, worked on different modules
- Developed and launched an **Ionic** and **Angular-based app**, Care App, for telecom industry; enhanced user experience and increased customer engagement by 40% within the first quarter.
- **Roles and Responsibilities:**
 - I gathered client requirements and estimated work completion time.
 - Excellent communication skills with the ability to work and contribute to a collaborative working culture.
 - Work experience in Bug fixing after completion of the whole project.

Software Engineer | Front End Developer

Prodapt Solution

April 2021 - June 2023

- I have worked on **react.js** where I am adept at creating dynamic and scalable user interfaces. Extensive expertise in building **responsive web applications**, managing state efficiently, and **optimizing performance**.
- We provide different markets and brands for the other teams.
- Have little experience working with CMS.
- I have working experience with building market level functionalities like icons implementation, Static banner, table, promo-card.
- I have experience in working with **Scrum**, **Kanban** and also **SaFE**.
- **Roles and Responsibilities:**
 - I gathered client requirements and estimated accurate, efficient completion times.
 - Developer for the core UI and front end team in Prodapt Solutions
 - Bug-fixing in existing application as per business requirement
